## Springer è stata un pioniere nel confermare l'Open Access come un modello editoriale efficiente dedicato alla ricerca scientifica di alta qualità

2004 - Springer lancia il programma Open Choice, fruibile per la maggior parte delle riviste ad abbonamento (*subscription based*)

2008 - diventa il più grosso editore OA con l'acquisizione di BioMed Central

2010 - promuove un portfolio di riviste in tutte le aree scientifiche completamente OA: SpringerOpen

2012 - Springerplus: rivista interdisciplinare

2012 - SpringerOpen **Books**

Con oltre 30.000 articoli OA pubblicati all'inizio del 2013 e un totale di 500 riviste, Springer è uno dei maggiori editori OA al mondo

Nel dettaglio, **Springer permette agli autori di ottemperare ai regolamenti istituzionali relativi all'OA** su due fronti

- **Green OA** – Springer consente l'auto-archiviazione in un sito personale o in un repository istituzionale e/o disciplinare degli articoli pubblicati su riviste tradizionali (subscription based)
- **Gold OA** – Springer propone varie soluzioni per la pubblicazione in riviste che permettono l'opzione "open access"

## Springer e GREEN OA

- Consente agli autori di depositare la **versione accettata** (pre-produzione) del proprio articolo all'interno del **proprio sito web** corredandola del relativo **link al sito Springer**
- L'Autore ha la facoltà di depositare la **versione accettata** (pre-produzione) del proprio articolo all'interno di **qualsiasi repository** con un **embargo di 12 mesi** dalla pubblicazione corredandola del relativo **link al sito Springer + DOI**
- ***L'Autore non ha la facoltà di depositare la versione definitiva del proprio articolo***

***Authors may self-archive the author's accepted manuscript of their articles on their own websites. Authors may also deposit this version of the article in any repository, provided it is only made publicly available 12 months after official publication or later. He/ she may not use the publisher's version (the final article), which is posted on SpringerLink and other Springer websites, for the purpose of self-archiving or deposit. Furthermore, the author may only post his/her version provided acknowledgement is given to the original source of publication and a link is inserted to the published article on Springer's website. The link must be provided by inserting the DOI number of the article in the following sentence: "The final publication is available at Springer via [http://dx.doi.org/\[insert DOI\]](http://dx.doi.org/[insert DOI])".***

## Springer e GOLD OA

- **Hybrid OA:** OpenChoice - disponibile sulla maggior parte delle riviste Springer “tradizionali”
- **Fully OA:** BioMed Central & SpringerOpen

### Hybrid Open Access

The screenshot shows the Springer website's 'Open Choice' section. It features a sidebar with 'Open access' links (Open Choice, SpringerOpen, Open access funding, Authors' rights, Open access track record) and a 'Springer Author Academy' box. The main content area is titled 'Open Choice—Your research. Your choice.' and explains the program's benefits, including high visibility, easy compliance, reuse and immediate deposit, retaining copyright, and automatic export to PubMed Central. It also includes sections for 'Identification of open access article' and 'Copyright and open access license'.

**Open Choice—Your research. Your choice.**

Our Open Choice program allows authors to publish open access in the majority of our established subscription-based journals.

When you choose Open Choice you and your readers benefit from:

- High visibility thanks to unrestricted online access
- Easy compliance with open access mandates
- Reuse and immediate deposit of final article in any repository
- Retaining the copyright to your work
- Automatic export triggered to PubMed Central/Europe PubMed Central (PMC)

**Identification of open access article**

Open access articles can be identified as open access, in the article PDF, HTML and in the article metadata. They are also clearly labeled at [SpringerLink](#) using the open access button.

**Copyright and open access license**

If authors choose open access in the Springer Open Choice program, the copyright remains with them, the authors of the article.

As of January 16 2012, the majority of Springer's Open Choice eligible journals publish open access articles under the liberal [Creative Commons Attribution \(CC BY\) 4.0](#) license. The CC BY license permits commercial and non-commercial re-use of an open access article, as long as the original

## Articoli Open Access **versus** Articoli su riviste tradizionali

- L'articolo è disponibile **gratuitamente a tutti**
- **Il Copyright** resta dell'autore
- L'articolo viene pubblicato sotto la **Creative Commons Attribution Licence (CC BY 4.0)**

- Il **costo** di pubblicazione è **sostenuto a monte... APC**

## APC – Author Processing Charge

Per le **riviste Springer** il **costo (APC)** può essere:

- Sostenuto direttamente dall'autore (contributo alla ricerca o altro finanziamento)
- Sostenuto da un'istituzione: più di 100 istituzioni e università, come Harvard e il Karlsruhe Institute of Technology (KIT) hanno creato fondi dedicati
- Funders: Wellcome Trust, Research Councils UK (RCUK), National Institutes of Health (NIH), Telethon, (Horizon 2020)... contribuiscono a coprire le APCs
- Non richiesto (per difficoltà economiche) o su un'invito dell'EiC

Elenco Istituzioni e Funders (aggiornato al giugno 2013):

### About the Author

**Jeffrey Beall**

I work as a librarian at Auraria Library, University of Colorado Denver, in Denver, Colorado.

An academic librarian for over 23 years, I have published extensively in the areas of metadata, full-text searching, and information retrieval.

My interest in scholarly open-access publishing began in 2009 when I reviewed the publisher *Bentham Open* in *The Charleston Advisor*, a journal that reviews electronic resources.

Previously, I served on the editorial board of *Cataloging & Classification Quarterly*, an experience that, in addition to my own research and writing, helped me learn a lot about scholarly communication. My service on this editorial board ended in December, 2012.

A full list of my publications is available on my [website](#). In 2012 I was awarded tenure and promoted to associate professor.

My email address is [jeffrey.beall@ucdenver.edu](mailto:jeffrey.beall@ucdenver.edu).

# Open access academy: now featuring interactive courses

Welcome to the **Open Access Academy**, a guide from Springer and Edanz on open access publishing and its benefits for authors. The course **includes interactive features like quizzes and certificates.**

## What is open access?

Open Access (OA) publications are freely available online for anyone, anywhere, and at any time. In an OA model, all costs associated with the added value provided by publishers are covered up front. The content is delivered at no cost to the reader and without restrictions, expanding access to literally anyone with an Internet connection and an interest in a given topic. This is an especially salient point for authors of scientific content.

[» Learn more](#)

- Contengono elementi interattivi (come video, quizz con soluzioni e rimandi alla teoria, esercizi interattivi, test di valutazione finale, ecc)
- E inoltre offrono l'opportunità di scambiare idee e informazioni con gli altri partecipanti (studenti, professori, assistenti)
